

Riverfront Park, Tilton, NH

LWCF Funding Assistance: \$100,000

One New Park, One Less Abandoned Mill

A \$1.3 million waterfront park is taking shape in downtown Tilton at the site of an abandoned flour mill with help from the Land and Water Conservation Fund in partnership with state and local funding and a remarkable show of community support. The 2-acre site, restored for public use by an EPA funded cleanup, will feature boat ramps, fishing piers, picnic areas and a main pavilion topped by a restored bell preserved from the mill tower.

“Our restored bell symbolizes the spirit of this project—we called on the Tilton community and they responded affirmatively—with creative suggestions for refining the park’s design and generous donations of money, materials and in-kind service. Public participation has been key to the success of this project—and at the end of the day we will all reap the benefits of having a wonderful new park.”
